

## COMMUNITES FOR IMMUNITY GRANT

### ***Hull Lifesaving Museum Addresses Vaccine Hesitancy***

HLM has received a grant funded by the CDC called *Communities for Immunity*. Under this grant, HLM will offer its unbiased, non political opinion and advice on Covid 19 vaccinations. HLM has been studying the pandemic since early winter 2020 along with treatments and preventative measures. Here are the basic facts as we have come to understand them through hours of study. The Covid 19 pandemic is real and has killed over 700,000 people in the United States. HLM has aggressively followed the CDC guidelines as they have evolved to protect museum staff, volunteers and guests. At this time, all HLM staff and rowing club members have been voluntarily vaccinated. Only a few, short term side effects have been reported. The vaccines have proven to be safe and effective and HLM urges people to get vaccinated to protect themselves as well as the people around them.
